To: Suppliers Delivering to BWI Receiving Points

Re: Multiple Delivery Points

As a supplier to Northrop Grumman supporting our Baltimore Operations you may be aware there are numerous receiving locations. It is important that deliveries are shipped to the correct locations in accordance with purchase order instructions. In addition, suppliers should be aware that purchase orders with multiple line items could represent more than one delivery point. Suppliers are required to package, label and deliver in accordance with all purchase order instructions to the stated delivery address.

NOTE: Consolidated packaging (Multiple purchase orders packaged in the same container) is only allowed for materials to the same delivery point.

Northrop Grumman Receiving Operations appreciates the cooperation by our suppliers as we work together to ensure on time delivery and timely receipt of materials in support of our programs. Questions regarding delivery address should be directed to the authorized NG buyer.
